DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Beerling et al. (US Patent 6,325,488).
- 3. Beerling et al. discloses:
 - Claim 1:

a support member (301 in fig.5) for supporting a plurality of inkjet printhead modules (205 in fig.5) within an inkjet printer, the support member comprising:

a first component (617 in fig.6) and a second component (615 in fig.6), the first component adapted for mounting in the inkjet printer (col.6, line 8), and the second component adapted to mount the printhead modules (col.6, line 10), the second component having a coefficient of thermal expansion closer to that of the printhead modules than the first component (col.3, lines 18-22; it is inherent that silicon has a coefficient of thermal expansion closer to the printhead module than a metal component since it is well known that silicon is the material used as the base for most integrated circuits); wherein,

Art Unit: 2861

the first component is bonded to the second component via an intermediate resilient material; such that (609 in fig.6; metal is capable of returning to an original shape or position after having been compressed),

the first component can expand more than the second component (it is an inherent property of a metal more than a dielectric.)

Allowable Subject Matter

- 4. Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 5. The following is a statement of reasons for the indication of allowable subject matter:
 - Claim 3:

The primary reason for allowance for this claim is the inclusion of the limitations of a support member comprising a first component being an outer metal shell, and a second component being a core of silicon within the outer metal shell. It is these limitations, either alone or in combination as claimed that have not been taught, found, or suggested by prior art.

• Claims 4-6:

Art Unit: 2861

These claims are considered allowable subject matter due to their dependency on allowable claim 3.

Response to Arguments

Applicant's arguments with respect to claims 3-7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jannelle M. Lebron whose telephone number is (571) 272-2729. The examiner can normally be reached on Monday thru Friday 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vip Patel can be reached on (571) 272-2458. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
